The House:

*Notes* that pursuant to section 2 (a) of the Water Resources Act of 1993, Nigerian citizens have the fundamental right to take and use water for domestic purposes;

*Aware* that boreholes and wells are the most popular and easily available sources of rural water supply in Nigeria;

*Further note* that water sanitation is the root of preventive healthcare which is more cost-effective than curative health measures, hence adequate domestic water supply is a cardinal component of the Millennium Development Goals;

*Disturbed that* sections 1,4 and 5 of the Water Resources Act 1993 vested all-round administration of Nigeria waters including Federal boreholes in the Ministry of Water Resources;

*Regrets* that in spite of these constitutional provisions there is no maintenance done to guarantee continuous functioning of both the electric-powered, solar and hand-pumped wells constructed under the aegis of the River Basin Authorities,

*Worried that* failure of the federal boreholes and deep wells to effectively serve Nigerian rural populace in spite of the annual budgetary expenditure caused this year's acute water shortage experienced in many states, especially northern states as published in Nigeria's Newspapers;

*Further aware that* meeting the exigencies of portable water to Nigerian rural populace require immediate overhauling of all existing boreholes and institutionalizing their regular maintenance mechanism by the River Basin Authorities;

*Resolves to:*

- (i) Urge the Minister of Water Resources to carry out overhauling of all Federal boreholes within a reasonable period;
- (ii) Further mandate the Committee to report to the House within a reasonable period, results of such overhauling and the continuous maintenance mechanism so instituted.
