12. **Need for Security Agencies to Involve Experts in the Destruction of Illegal Refineries and Boats Laden with Petroleum Products to Prevent Environmental Degradation**

Motion made and Question proposed;

The House:

Notes that the increase in illegal oil refineries in the creeks of the Niger Delta has become alarming and has added a new twist to the economic and security challenges confronting the nation, even with the plan of turning them to modular refineries;

Also notes that the quest to acquire crude oil illegally by non-professionals is devastating the environment, destroying wild and aquatic lives as well as stunting the economic development of the nation, thus resulting in an estimated loss of 10.9 billion dollars between 2009 and 2011;

Aware that section 20 of the Constitution of the Federal Republic of Nigeria, 1999 provides that the State shall protect and improve the environment and safeguard the water, air, land, forest and wildlife of Nigeria while section 2 of the Environmental Impact Assessment Act, Cap. E12, Laws of the Federation of Nigeria, 2004 also provides for restriction on public or private projects without prior consideration of their impact or effects on the environment;

Also aware that in a bid to curb the menace, the Nigerian Security and Civil Defence Corps, the Nigerian Army and the Nigerian Navy have collectively destroyed at least 280 illegal refineries and barges loaded with petroleum products and secured the conviction of 40 perpetrators out of the 118 arrests made in the last one year in the Niger Delta region;

Concerned that despite the commendable efforts of the various security agencies to curb the menace of illegal refineries, the methods adopted in the destruction of those refineries are further endangering the environment of the region and negatively affecting the general health and well-being of the people because wastes emanating from the destroyed refineries and barges are washed into the creeks and the ocean;

Observes that failure by security agents to involve experts in carrying out the destruction of the refineries poses environmental hazards just as the existence and operation of those illegal refineries themselves;

Resolves to:

- (i) commend the security agencies for their role in checking the menace of oil bunkering and operation of illegal refineries in the Niger Delta Area; and

- (ii) mandate the Committees on Petroleum Resources (Upstream), Petroleum Resources (Downstream), Environment and Habitat, Army, Navy, Interior, Niger Delta, and Legislative Compliance to interface with relevant Security Agencies to ensure that officials of relevant Ministries, Departments and Agencies (MDAs) are involved in the process of destroying illegal refineries and boats laden with petroleum products to guarantee, to an extent, retrieval of the stolen crude oil, avoid spillage, either on land or water, as well as minimize economic losses and also avoid pollution and degradation of the environment, and report back within six (6) weeks for further legislative action (*Hon. Ime Owoidighe Ekpoattai — Eket/Onna/Esit Eket/Ibeno Federal Constituency*).

Debate.

Amendment Proposed:

Leave out Prayer (i) (Hon. Ossai Nicholas Ossai — Ndokwa East/Ndokwa West/Ukwuani Federal Constituency).

Question that the amendment be made — Agreed to.

Question on the Motion as amended — Agreed to.

The House:

Noted that the increase in illegal oil refineries in the creeks of the Niger Delta has become alarming and has added a new twist to the economic and security challenges confronting the nation, even with the plan of turning them to modular refineries;

Observed that failure by security agents to involve experts in carrying out the destruction of the refineries poses environmental hazards just as the existence and operation of those illegal refineries themselves;

Resolved to:

13. Need to Implement the 2017/2018 Dry Season Growth Enhancement Support Scheme (GESS) Programme

Motion made and Question proposed;

The House:

Notes that Nigeria is blessed with abundant arable land and water resources suitable for cultivation of varieties of crops such as rice, maize, wheat, sorghum, millet, groundnut, cotton, soya bean, benniseed, cassava, oil palm, cocoa, rubber, gum Arabic, horticultural crops and vegetables, all under both rainfall or irrigation, and also the rearing of animals such as cattle, sheep, goat and production of fisheries and aquaculture;

Also notes that farming has become the main occupation of majority of the citizens, especially those living in the rural areas and of recent, some urban dwellers as the country has a vast irrigable land that is suitable for irrigation farming, coupled with available irrigation facilities from the River Basin Development Authorities (RBDAs);

Further notes that the Federal Government established the Growth Enhancement Support Scheme (GESS) as a vehicle to ensure the equitable distribution of farm inputs to farmers nationwide;

Aware that the GES Scheme, based on its Implementation Strategies and Operational Modalities (ISOM), creates redemption centres (selling points) across the country which are close to the farmers to ensure the development and sustenance of the permanent input markets down to the grassroots where the targeted end user farmers reside;

Also aware that the establishment of the GES Scheme ensured that procurement and distribution of farm inputs, elsewhere done directly by Government, has now been transferred to private sector operators, and in the same vein, the beneficiaries of the farm inputs are not only known by names, but by their respective chosen commodities value chains, while their locations and full biometric information are stored in the national database;

Cognizant that the expected impact of the dry season farming, especially in the light of the country's determination to actualize self-sufficiency in rice, wheat and maize production cannot be overemphasized as through its implementation, the nation will meet substantial part of its food requirements and have excess for export to earn the much needed foreign exchange;

Observes that available information on existing irrigable lands, their locations, sources of water and the optimum number of farmers that could utilize the irrigation facilities show that there are 1,179,269.79 hectares of potential irrigable lands, 2,869 number of irrigable facilities that could be used by 1,142,087 farmers during the forthcoming 2017/2018 dry season farming, out of the 14.76 million farmers in the database.

Resolves to:

- (i) urge the Federal Ministry of Agriculture and Rural Development to ensure the implementation of the forthcoming 2017/2018 Dry Season GESS Programme because of its importance to the nation's desire to ensure self-sufficiency in major staple food crops;

- (ii) also urge the Ministry to support farmers with the required input package for the forthcoming 2017/2018 dry season farming in order to bridge the production gap created by non-implementation of the GESS Programme during the 2017 wet season; and
- (iii) mandate the Committee on Agricultural Production and Services to ensure implementation (*Hon. Munir Baba Dan Agundi — Kumbotso Federal Constituency*).

Debate.

Agreed to.
